2027 F-SERIES

BUILT TO CHOOSE BUILT TO LAST

From Class 6 FTR to Class 7 FVR, Isuzu F-Series trucks give you the flexibility to spec exactly what your operation demands. Isuzu trucks deliver proven durability, smart productivity, and confidence at every turn—so no matter which configuration you choose, you're choosing a truck engineered to work as hard as you do.

A Wide Range of Choices: What will it be? Class 6 FTR or the Class 7 FVR ... wheelbases from 152 to 248 inches ... GVWRs at 25,950 or 33,000 pounds? The choice is yours.

Expertise: A predecessor company of what is now known as Isuzu Motors Limited produced its first truck in 1922. Over a century later, Isuzu Motors Limited is one of the most experienced truck builders in the world.

Durability: Every Isuzu F-Series truck is equipped with a Cummins B6.7 diesel engine. It is the most popular engine built by Cummins and with over 12 million sold, it is a testament to durability in the medium-duty segment.

Productivity: The low cab forward design of Isuzu trucks provides more cargo space within a given overall length plus best-in-class maneuverability. That means drivers can reach tighter places in less time. And the Isuzu Hexapod cab maximizes interior space and optimizes comfort.

Low Cost of Ownership: Isuzu's available Priority Service Maintenance Program allows you to pay for your maintenance needs in advance—allowing you to budget your transportation costs up front.

Peace of Mind: Isuzu trucks are backed with warranties that demonstrate our belief in our products.

Across Canada and beyond, Isuzu has earned a reputation for dependable low cab forward trucks built for real work. Discover what inspires such loyalty—and why, now more than ever, Isuzu trucks are the trucks you can trust for the work you do.

THE POWER OF TEAMWORK

As one of the first car builders in Japan, Isuzu Motors Limited has developed strategic alliances with other companies to make sure its products meet and exceed the needs of its customers. There is no greater evidence of the benefits of this inclusive strategy than the line of Isuzu F-Series trucks.

CUMMINS B6.7

Isuzu F-Series trucks are powered by the Cummins B6.7, the most popular engine ever built by Cummins. Over a span of 40 years of development and improvement, well over 12 million Cummins B-series engines have been sold. This historic accomplishment is a testament to the engine's technological advances and durability in the medium-duty segment.

This 6.7-liter turbocharged inline 6-cylinder diesel engine puts out 260 horsepower and 660 lb.-ft. of torque through a gearbox provided by another valued partner, an Allison 2000-series RDS automatic transmission. This combination makes for a seamless transfer of power from the engine to the asphalt. The powerful engine and smooth shifting six-speed transmission bolster the driving experience by easily moving heavier payloads through urban environments and over the road.

THE CHOICES ARE YOURS

Available in both Class 6 and 7, Isuzu F-Series trucks' low cab forward design gives owners and drivers the maneuverability, visibility, power, and payload to move their cargo with ease.

How much truck do you need?

- Three models—the Class 6 FTR (25,950 lb GVWR), Class 6 FVR Derate (25,950 lb GVWR) and Class 7 FVR (33,000 lb GVWR)
- Eight wheelbases - 152-248-in., accommodating body lengths from 14 to 30-ft.
- 50- or 100-gallon fuel tank, based on wheelbase
- Optional air suspension and low-pro tires

As with all Isuzu low cab forward trucks, F-Series models feature superb maneuverability, visibility, and comfort. Add in the rugged Isuzu chassis, driver-friendly Hexapod cab, the Cummins/Allison powertrain, and Isuzu's long-standing reputation for a low total cost of ownership, and it becomes clear. An Isuzu F-Series truck isn't just a great choice—it's the right choice.

F-SERIES HIGHLIGHTS

LED LIGHTS

LED headlamps and daytime running lights improve safety and styling. With brighter illumination, drivers have better visibility in nighttime conditions and trucks are more easily visible to pedestrians and oncoming traffic.

CUMMINS B6.7 ENGINE

The B6.7 is a 6-cylinder diesel engine that generates 260 horsepower and 660 lb.-ft. of torque. This power and torque combination easily moves heavier payloads through urban environments and on the highway.

EXHAUST

The Cummins Single Module After-Treatment has a linear design to help keep the frame rails clean. It incorporates the diesel particulate filter (DPF), selective catalyst reduction (SCR), exhaust cooler, and electronic exhaust restriction into a compact single-piece unit.

AIR SUSPENSION (OPTIONAL)

Isuzu F-Series trucks are available with optional air suspension. The air compressor puts out 17 CFM to quickly fill the air tanks and fill the suspension's air bags. This option is popular for customers hauling fragile cargo or who need to lower the chassis height for loading and unloading.

INVITING INTERIOR

The Isuzu F-Series trucks have dual-colored seats and a two-tone gray interior design that create a comfortable cabin for three passengers. Built for comfort with numerous storage areas, the additional space behind the seats is quickly noticed and adds to the spaciousness of the cabin.

ALLISON RDS TRANSMISSION*

The Allison Rugged Duty Series™ transmission was built for the medium-duty market. Its proven durability and reliability provide greater uptime with a lower cost of operation.

WHEELS / TIRES

Isuzu F-Series trucks are equipped with standard 11R22.5 tires on steel wheels. Customers can opt for aluminum wheels (shown) and, on the Class 6 FTR, choose the optional low-pro tires that lower the chassis for special applications like rollback bodies.

ACCESSORIES

- AGM Batteries (825 CCA x 2)
- Air Suspension
- Aluminum Wheels
- Back-Up Alarm
- Chrome Grille
- Emergency Engine
- Shutdown System
- Engine Idle Shutdown (3 or 5 minutes)

*The Cummins engine is warranted separately by Cummins. Please see your authorized Isuzu dealer for available Cummins coverage.

**The Allison automatic transmission is warranted separately by Allison Transmission. Please see your authorized Isuzu dealer for available Allison Transmission coverage.

†After 3 years, coverage is 50% labor and parts for up to 5 years.

††Tows related to emissions issues may be covered for up to 5 years or 160,000 kilometers (whichever comes first).

†††Emission components are covered by Isuzu or by Cummins; see your Isuzu dealer for details.

SUPPORT YOU DESERVE FOR TRUCKS YOU TRUST

Call (866) 441-9659 - 24/7/365 - It is as simple as that when you're in need. Roadside Assistance is standard on all new Isuzu trucks. It covers tows, jump starts, lock outs, and fueling (owner is responsible for cost of fuel). Please see an authorized Isuzu dealer for details.

Specifically designed replacement parts developed for Isuzu trucks are approved for all warranty repairs and carry a one-year/unlimited-mile warranty. See an Isuzu dealer for warranty details.

Preventive maintenance increases your operating efficiency and maximizes your fuel economy. This comprehensive program protects you against increasing labor and parts costs for up to five years. PSMP also guarantees you "Priority" treatment during your service visits and when roadside assistance is needed. And, any unused portion of your PSMP can be rolled into your next purchase, transferred to the truck's next owner, or refunded to you.

Isuzu FleetValue Parts are priced to compete with aftermarket parts—but have been engineered to meet Isuzu's stringent specifications and exacting standards for quality, performance, safety, and reliability. And they carry a one-year, unlimited-mile warranty.

The warranty coverages are determined by the kilometrage of the vehicle and the number of years from the delivery date. The warranty coverages are limited by whichever occurs first. Please see your authorized Isuzu dealer for warranty details.
